"We have two businesses: continuing legacy operations and canna-pharmaceuticals. We have filed six cannabis-based patents addressing various ailments and expect to make our most advanced and promising formulation, Hyalolex for Alzheimer's, available to patients in select U.S. states in the first two months of 2018. Roughly 5.3 million individuals in the U.S. and 44 million worldwide suffer from this debilitating disease. Our formulation, Hyalolex, has been shown to address the primary indicators of Alzheimer's, plaques and tangles, as well as alleviate several end points of the disease like anxiety and sleep disorder. Importantly, this is achieved without the patient getting high, or suffering long-term damage to neurons," states Ram Mukunda, IGC CEO.

#### **About IGC:**

IGC is engaged in the development of cannabis based combination therapies to treat Alzheimer's, pain, nausea, eating disorders, several end points of Parkinson's, and epilepsy in dogs and cats. IGC has assembled a portfolio of patent filings and four lead product candidates addressing these conditions. The company is based in Maryland, USA.
